Ferns N Petals Sales Analytics - Business Requirements Document (BRD)

Executive Summary

Ferns N Petals requires a sales analytics solution to monitor revenue performance, customer purchasing behavior, product demand, occasion-based sales patterns, geographic order distribution, and delivery efficiency. The dashboard should provide actionable insights for inventory planning, marketing campaigns, and operational decision-making.

Business Objectives

Track sales performance, identify high-revenue occasions and products, analyze customer behavior, monitor regional demand, evaluate delivery efficiency, and support data-driven business decisions.

Data Sources

Orders (Fact Table), Customers (Dimension Table), and Products (Dimension Table).

Key KPIs

Total Orders, Total Revenue, Average Customer Spending, Average Delivery Time, Revenue by Occasion, Revenue by Category, Revenue by Product, and Orders by Location.

Business Questions

1. What is the total revenue generated? 2. How many orders were placed? 3. Which occasions generate the highest and lowest revenue? 4. Which product categories and products contribute most to sales? 5. Which months and hours generate peak revenue? 6. Which locations receive the highest order volumes? 7. What is the average delivery time? 8. Is there any relationship between order timing and the number of products ordered? 9. Do larger basket sizes occur during specific order hours?

Dashboard Requirements

Executive KPI Overview, Occasion Performance Analysis, Product & Category Analysis, Geographic Analysis, Monthly Revenue Trends, Hourly Revenue Trends, and Delivery Performance Monitoring.

Expected Deliverables

Interactive Excel Dashboard, KPI Reporting Framework, Pivot Table Analytical Layer, and Business Insights Report.
